

# AMER KUSSAD

## FRONT-END DEVELOPER

Ras Al Khaimah, UAE | [amerkussad5@gmail.com](mailto:amerkussad5@gmail.com) | [LinkedIn](#) | [GitHub](#)

### PROFILE

Front-end developer focused on building responsive, polished web experiences with React, Next.js and TypeScript. Built and deployed recruitment and restaurant web projects with bilingual interfaces, admin workflows, responsive layouts and production deployments. A background in recruitment and customer service supports clear communication, attention to detail and user-focused thinking.

### SELECTED PROJECTS

#### Tatweer Employment - Recruitment Web Application

Live

React · TypeScript · Vite · Tailwind CSS · Supabase · PostgreSQL · Cloudflare Workers

- Built a bilingual Arabic/English recruitment experience with RTL/LTR layouts, job discovery, dynamic job details, candidate applications, employer requests and contact flows.
- Implemented authenticated admin workflows for job management, submitted data review and protected candidate file access using Supabase Auth, RLS and Storage.
- Deployed the production application on Cloudflare Workers and added first-party visitor analytics for the admin experience.

#### Casa Luce - Front-End Restaurant Website

Live + GitHub

Next.js · React · TypeScript · Tailwind CSS · App Router · Vercel

- Created a responsive multi-page restaurant website covering Home, Menu, Our Story, Gallery, Reservations and Contact with an image-led editorial visual system.
- Built front-end reservation/contact form demonstrations with validation and success states; no backend persistence.
- Implemented responsive behavior, accessibility-focused interactions, metadata/SEO support and production deployment on Vercel.
